

ENVIRONMENTAL POLICY

IC Pipes respects the environment in which we operate and are committed to ensuring that in the delivery of our service, that all reasonable measures are implemented to prevent or minimise environmental impacts in accordance with Local and State legislation, and the framework of ISO14001:2015.

To achieve our goal of environmental sustainability in our operations, all representatives of IC Pipes, including staff and subcontractors, are expected to adhere to the following environmental principles to achieve our targets;

- To respect the Client, community and other stakeholders property and leaseholds.
- Acknowledge the traditional owners of the lands and their cultural heritage sites.
- IC Pipes representatives will show respect to natural environments (flora, fauna heritage sites and ecosystems) by taking all reasonable measures to prevent or minimise environmental harm, including prevention of pollution.
- To commit to demonstrating good environmental performance and to continually improve the integrated management system and environmental practices and reduce its carbon footprint through setting of objectives and targets on Senior Management.
- Disposal of waste in accordance with best practice environmental management by identifying and utilising sustainable options for waste disposal, including the hierarchy of control for waste management.
- To minimise environmental harm, by having preventative measures in place to manage identified environmental aspects and impacts
- To comply with the relevant Territory, State, and Federal environmental legislation and other relevant codes and standards
- To commit to training personnel in environmental responsibilities and involve stakeholders in planning involving environmental issues and their management.
